

Dear Patients

The health of your teeth matters both to you and to us. Our friendly team consists of a group of highly-qualified professionals, dedicated to meeting your particular needs.

Our practice offers a complete spectrum of dental services. They range from simple, composite fillings and ceramic inlays to more complex crown and bridge prostheses and implants, which we have been carrying out for many years, using treatments that are as free from pain and stress as possible.

Our dental practice has also an excellent reputation outside Switzerland, in particular in the field of aesthetic dentistry and implants surgery. Our exclusive use on request of porcelain and zircon oxide both in fillings and partially in implants ensures aesthetically-satisfying results while respecting the environment.

All our dentists are licensed specialists and have many years of intensive specialist training behind them. Continued training is as important to us as is the wish to provide you with the best service and most modern dentistry possible.
